AFFIDAVIT OF PLAN CONSISTENCY

DR:Subject Address:	
and approved in the application and plans	ural plans are consistent with the scope of work as represented submitted for design review. We fully understand that should as and application shall govern the approved scope of work.
review plans as "existing to remain" approved project will be subject to a Stop of said modified plans is obtained. This	portions of any structure shown on the approved design are subsequently removed for any reason, the previously p Work Order until modified plans are submitted and approval process may involve substantial additional processing time, day noticing period if further design review is required.
WARNING: BE VERY CAREFUL ABOUT WHAT IS DEMOLISHED! As noted above, if demolition exceeds that which has been approved, your project will need a new City approval for any such modifications. This may involve <i>substantial</i> additional processing time, including Zoning plan check and a Design Review hearing requiring a minimum 28-day noticing period. Additional City fees will also be required. Furthermore, the project may become subject to <i>current</i> development standards, guidelines and City policies, which could require discretionary approval of various encroachments and/or variances. City fees for <i>consideration</i> of such variances can be significant and approval is typically difficult to obtain. If such variances or encroachments are not approved, a <i>substantial re-design</i> of the <i>project or demolition of the structure</i> may be necessary.
