Dear Plan Check Manager:

I have made a search of the available records, as well as a physical inspection of the site and all water wells found within 200 feet of the proposed improvements, if any, are shown on the plans.

I have checked and determined from the following company(ies) having substructures in the affected area that the location and size of such structures, as shown on the submitted plans, are the same as shown on such company's record and, to the best of my knowledge, that there is no interference with the proposed improvements.
