### **Industrial Waste Closure Permit Application Checklist**

The Santa Fe Springs Fire Department has developed this checklist to assist businesses and contractors. It is used to provide a concise list of items that are required in order to obtain an industrial waste permit for closure.

- Complete Santa Fe Springs Fire Department Plan/Review Permit (Application form available at Fire Department)
- Pay fees
- Complete Industrial Waste Closure Permit Application (attached).
- Read Authorization for Closure Conditions and Limitations (listed on back of Industrial Waste Closure Permit Application).
- Plot plan.

Submit a scaled plot plan showing the size and location of the industrial waste pretreatment equipment to be removed along with proposed sample locations and analytical methods to be used.

- Obtain sewer/plumbing permit from the Building and Safety Department located at City Hall (562) 868-0511.
- Submit closure report no later than 30 days after the removal is complete

*The information above only applies to the removal of industrial wastewater pretreatment equipment NOT permitted as hazardous waste treatment unit or an underground storage tank pursuant to Chapter 6.5 and Chapter 6.7 of the California Health and Safety Code, respectively.*
