Notes:

All Landscape plans are subject to City Review.

This document is provided as a guide and other plants may be considered.

All plant selections are to take into account site specific factors, especially design context, soil depth, soil type, wind, sun exposure and water needs.

Plant types and count:

- T = Tree (43)
- S = Shrub (69)
- P = Perennial (34)
- G = Grass or Grass-like (14)
- V = Vine (5)
- F = Fern (3)

NCN = No Common Name

CA Natives = Some plants are identified to the genus level and may include both native and non native species. For example Quercus spp. includes both native trees, such as Quercus agrifolia, a California native, and non natives such as Q. coccinea, an east coast native. Some of the California natives may not be known to be endemic to the Brisbane area.

2001 List = A asterisk (*) indicates the plant was previously included in the Sierra Point Combined Site and Architectural Design Guidelines (3/12/01) plant list.

Plants removed from 2001 list:

1. Alnus Rhombifolia (White Alder): High Water Demand
2. Casuarina cunninghamiana (River She Oak): Susceptible to branch breakage
3. Cupaniopsis anacardiodes (Carrot Wood): Brittle, potentially invasive and deep rooting
4. Eucalyptus (various): Issues vary by species, including invasiveness, litter, branch breakage, fire prone
5. Nyssa sylvatica (Sour Gum): Tap root and water loving
6. Pinus halepensis (Aleppo Pine): Die off from unknown causes. Maybe invasive.
7. Salix babylonica (Weeping Willow): High water demand
8. Nerium oleander (NCN): All parts are poisonous – not suitable in areas where children may play.
