### FLOOR AREA RATIO (FAR) CALCULATION

Use the following definitions to calculate FAR in the Central Industrial Redevelopment Project Area.

“Floor Area Ratio” means the ratio of the total of the Floor Area of all buildings on a Parcel Area to the Parcel Area.

“Floor Area” means that area in square feet confined within the exterior walls of a building, but not including the area of the following: exterior walls, stairways, shafts, rooms housing building-operating equipment or machinery, parking areas with associated driveways and ramps, space for the landing and storage of helicopters, and basement storage areas.

“Parcel Area” means the area of a parcel not including any portion of the parcel that will be, upon the completion of the development, subject to a public street, highway or sidewalk right-of-way or easement, whether by dedication, tract map recordation, public acquisition or other means, provided, however, that the term Parcel Area shall include areas set aside or used as part of an inter-structural connecting pedestrian way or walkway system.
