Not Human Subjects Research Application

1. Date:

2. Principal Investigator:

3. Research Project Title:

This application is used to determine if a project meets the regulatory definition of human subjects and/or research. When the IRB determines a project does not meet the regulatory definitions, a determination letter will be generated which states IRB approval is not required. If the IRB determines the project does meet the regulatory definitions, an IRB Application for Review of a Research Project must be submitted for IRB approval.

"Human subjects"

4. Does the study involve interaction or intervention with live human subjects?*
- (Though interaction or intervention may have occurred previously, information/data/specimen(s) were collected from live subjects)
5. Is the information/data/specimen(s) obtained about the subjects?*
- (i.e., Does the the research data to be collected pertain to the individual subject, or is the data to be collected merely provided by the subject?)
6. Is the collected information/data/specimen(s) private information?*
- (Private information is that which allows identity of individual to be associated with the information/data/specimen(s).)

"Research"

7. Is your study designed to produce generalizable knowledge?*
8. Is your study systematic?*

Additional information

9. Provide a brief description of your study.*

10. Describe the subject population being studied:*

11. Provide a brief description of the design and methodology of the study:*

Survey or questions/data collection instrument attached if applicable.*
