

ATTENTION: CONSTRUCTION/ DEMOLITION PERMIT APPLICANTS

Effective October 12, 1999, all applicants for construction/demolition permits shall:

1. Either contract with the City's recycling contractor for the removal of the debris, or self-haul to an approved disposal site. (SEMMC Section 13.12.720)
2. Prior to receiving a permit from the City for construction or demolition, the Contractor has to develop and submit a plan to recycle and salvage the projected construction and demolition debris to the greatest extent feasible. (SEMMC Section 13.12.730)
3. Should the contractor choose to self-haul the debris to an approved site, submission of a dump ticket is required before final inspection sign-off. The ticket shall contain the address of the project site, the name and address of the disposal site, and the tonnage of the debris (SEMMC Section 13.12.740)

CITY OF SOUTH EL MONTE

RECYCLING PLAN FOR CONSTRUCTION & DEMOLITION DEBRIS

I have read the requirements for recycling construction and demolition debris. I understand that I have to submit a recycling plan prior to issuance of a permit.

I certify that the following materials will be taken to an approved disposal site as listed. (If contracting with City-sponsored recycling company, indicate on the blank).

1. Insert Material _____
(concrete, asphalt, rock, sand, gravel, concrete block, slump stone)
2. Red Clay Brick _____
3. Scrap Metal _____
4. Scrap Wood _____
5. Mixed Debris _____
(Mixed waste loads of wood, cinder block, gypsum drywall, brick, concrete, asphalt, rock and gravel, dirt, metal, cardboard)
6. Salvage Items _____
(iron and chain link fences, air conditioners, water heaters, plumbing fixtures, bathtubs, toilets, sinks, doors, windows, kitchen appliances, light fixtures, architectural items)

I understand that if I close to self-haul, I will provide dump tickets for each of the materials indicated above.

4. Unauthorized containers

A. Cardboard box, paper or plastic bag may not be used as a container for solid waste or recyclables.

B. Except as expressly authorized by this chapter, no person other than a collector may place a container for the collection of solid waste or recyclables on property within the city. Any container placed in violation of this section is declared to be a nuisance, and is subject to abatement pursuant to applicable provisions of this code.

C. The city shall notify, in writing, any person who violated subsection B of this section that he or she shall promptly and permanently remove such container from its location. The city shall deliver such written notice by posting a copy of the notice prominently upon the container. If the container is identified with the name and telephone number of its owner or a solid waste enterprise, the city shall also endeavor to contact the owner or enterprise by telephone. Failure to notify the owner or enterprise telephonically shall not invalidate the notice. The city may impound or cause to be impounded any such container located on public property if the same is not permanently removed from its illegal location within the time set forth in the notice, which time shall be not less than twenty-four hours after posting of the notice, or not less than six business hours after telephonic notification, if any. For purposes of this section, "business hours" shall mean the hours of seven a.m. to six p.p. Monday through Saturday. Any person who violates this section shall be liable to the city for all fines and charges levied in connection with the connection, transportation, storage and handling of such container by the city. The owner shall retrieve any container impounded by the city immediately after all applicable fines and charges have been paid. The city manager may delegate to the collector the authority to impound unauthorized containers and to collect the fines and charges levied by the city, in accordance with state local laws and regulations.

D. Upon posting of a written notice of violation upon the unauthorized container, the customer using the unauthorized container shall immediately cease placing solid waste and recyclable materials therein. (SEMMC 13.12.425)
